PLEASE READ THE FINE PRINT!

We must have CORRECT laser proofs accompany each job to ensure accuracy. If you do not provide proofs, you are responsible for initial and additional output costs that incur because of errors. It is very important that all material is reviewed prior to leaving with it. Every effort is made to assure the accuracy of your order, but you must make the final inspection. All orders are furnished on the condition that our liability is limited to the replacement of the incorrect order. Our responsibility is to rerun the original job. Should you choose NOT to have a color key or matchprint of your four color process work made... you are responsible for the trapping and color problems that may occur. We STRONGLY urge you to have this proof for your printer. Thank you for your attention to these finer details!
